## PERCHE' COMPRARE DIRETTAMENTE DA NOI?

Gli utensili e i ricambi svolgono un ruolo fondamentale quanto la macchina nella resa del prodotto finito. Testiamo sulle nostre macchine la validità degli utensili che ti offriamo e di cui possiamo garantirti la qualità.

Scegliendo i nostri utensili, ti potremo assistere sempre nel migliore dei modi conoscendo sia il macchinario che i ricambi originali.

## WHY BUY DIRECTLY FROM US?

Tools & Spare Parts play as fundamental a role as the machine in the yield of the finished product. We test on our machines the validity of the tools we offer you and whose quality we can guarantee you. By choosing our tools, we will always be able to assist you in the best way by knowing both the machinery and the spare parts.

DELIVERY

**DISCO A FASCIA CONTINUA VIT 1/B**  
Continuous rim Blade VIT 1/B  
**COMPACTLINE / INDUSTRIALINE**  
Ideale per marmo e pietra naturale  
Ideal for marble and stone

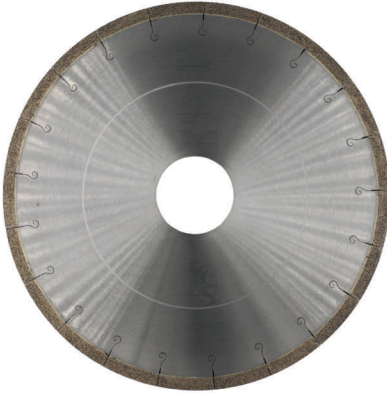

**DISCO A SETTORE 0HP**  
Segmented Blade 0HP  
**COMPACTLINE / INDUSTRIALINE**  
Ideale per laterizio e quarzo  
Ideal for brick and quartz

**DISCO A SETTORE SP1.2 1HP**  
Segmented Blade SP1.2 1HP  
**COMPACTLINE / INDUSTRIALINE**  
Ideale per taglio mosaico  
Ideal for cutting mosaic

**DISCO A FASCIA CONTINUA 2HP**  
Continuous rim Blade 2HP  
**COMPACTLINE / INDUSTRIALINE**  
Ideale per taglio antiscivolo  
Ideal for anti-slip cut

**DISCO A SETTORE 4HP**  
Segmented Blade 4HP  
**COMPACTLINE**

Ideale per gres porcellanato  
Ideal for gres porcelain

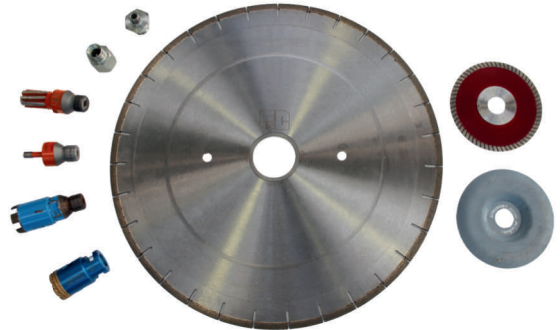

**DISCO A SETTORE TS35**  
Segmented Blade TS35  
**INDUSTRIALINE**

Ideale per gres porcellanato  
Ideal for gres porcelain

**DISCO A FASCIA CONTINUA VIT/2**  
Continuous rim Blade VIT/2  
**COMPACTLINE / INDUSTRIALINE**

Ideale per taglio con bisello  
Ideal for bevel cut

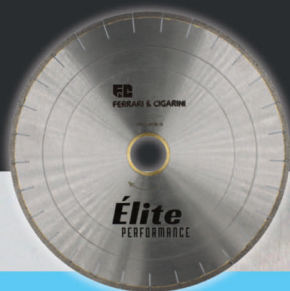

**UTENSILI PER MFL CNC 5 ASSI**  
Tools for MFL CNC 5 Axes  
**BIGSLIM**

# Élite

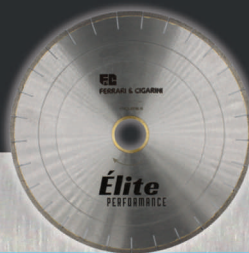

## PERFORMANCE

Disco a settori per taglio ad acqua ultra performante per grandi formati di gres porcellanato da 6 a 20mm di spessore, *dekton* e *lapitec*.

- anima silenziosa
- ideale per tagli verticali, 45° e taglio cerchio
- utilizzabile su tutte le macchine in commercio, con e senza inverter
- due misure disponibili: diametro 350mm e 400mm.

20620526

20620525

Ultra-performing sector blade for water cutting on large gres porcelain, *dekton* or *lapitec* formats, from 6 to 20mm thickness.

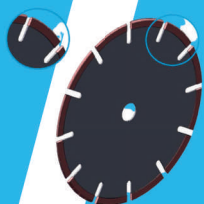

- silence steel core
- ideal for vertical, 45° and round cuts
- can be used on all machines on the market, with and without inverter
- two sizes available: diameter 350mm and 400mm.

# DISCHI: USO E MANUTENZIONE

## USURA IRREGOLARE ECCESSIVA:

si verifica quando il disco non è adatto al materiale. Può dipendere anche dalla potenza, dalla velocità di rotazione non adeguata della macchina o quando l'angolo di penetrazione al momento del taglio non è perpendicolare.

In ogni caso, un'usura eccessiva della parte diamantata non può essere imputata ad un difetto di fabbricazione.

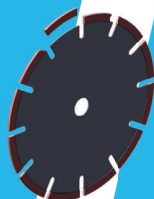

## IRREGULAR EXCESSIVE WEAR:

it occurs when the disc is not suitable for the material. It can also depend on the power, on the inadequate rotation speed of the machine or when the penetration angle at the moment of the cut is not perpendicular. In any case, excessive wear of the diamond part cannot be attributed to a manufacturing defect.

## DISTACCO O ROTTURA DEL DIAMANTE:

- Il disco non è adeguato al tipo di materiale che si sta tagliando o, durante il taglio, il materiale si è mosso (questo torce o blocca il diamante fino a romperlo).
- Il disco può essere diventato eccentrico, causando vibrazioni che possono rompere il segmento.
- Il materiale avanza troppo velocemente.
- Il disco può aver subito uno shock.

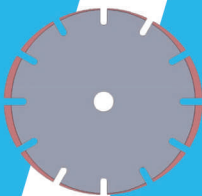

## DETACHMENT OR BREAKAGE OF THE DIAMOND:

- The wheel is not suitable for the type of material being cut or the material moved during the cut (this twists or blocks the diamond disc until it breaks).
- The disc may have become eccentric, causing vibrations which can break the segment.
- The material is advancing too fast.
- The disc may have suffered a shock.

## OVALIZZAZIONE DEL DISCO

- L'albero della macchina su cui è montato il disco ha dei cuscinetti usurati oppure i distanziali e le flange sono difettose.
- Il legante del disco è troppo duro per il materiale da tagliare, quindi il disco non taglia e si ovalizza.

## DISC OVALIZATION

- The shaft of the machine on which the disc is mounted has worn bearings or the spacers and flanges are defective.
- The disc binder is too hard for the material to be cut, so the disc does not cut and becomes oval.

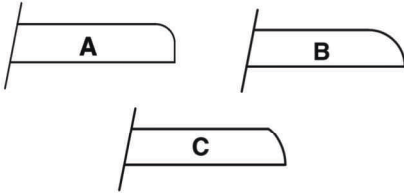

## SURRISCALDAMENTO ECCESSIVO

Il raffreddamento dell'acqua è insufficiente (basta qualche secondo senz'acqua per danneggiare il disco).

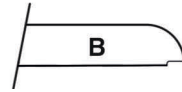

## EXCESSIVE OVERHEATING

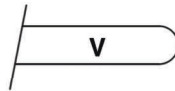

Water cooling is insufficient (a few seconds without water are enough to damage the disc).

**MOLA BATTISCOPA GR. GROSSA**  
Coarse grain wheel for Half-Bullnose  
B12, B15, B20 mm  
**COMPACTLINE**

**MOLA PER ASPORTARE MARCA**  
Wheel to remove mark  
from half-bullnose  
**COMPACTLINE**

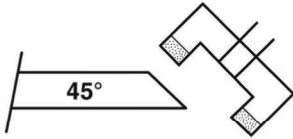

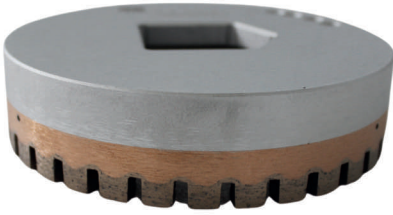

**MOLA TORO X GR. GROSSA**  
Coarse grain wheel for Bullnose  
20mm  
**COMPACTLINE**

**MOLA TORO V GRANA GROSSA**  
Coarse grain wheel for Bullnose  
V20, V30, V40mm  
**COMPACTLINE**

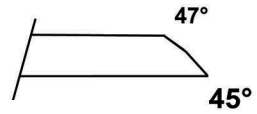

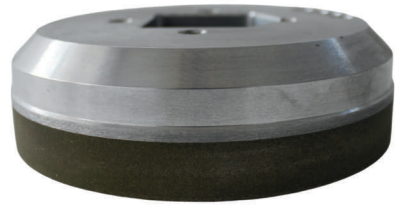

## MOLA A TAZZA 45° PRE-TAGLIO

Cup wheel for 45° bevel

10 - 20mm

**COMPACTLINE**

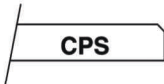

## MOLA RESINA 517 PER 45°

Resinoid wheel for 45° mitre

20mm

**COMPACTLINE**

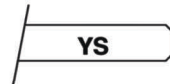

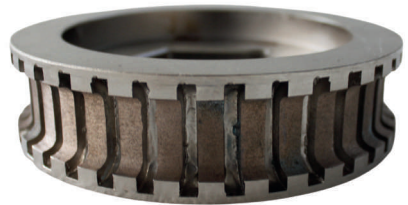

## MOLA ZOCCOLINO CPS

Wheel CPS for plinth

10 - 40 mm

**COMPACTLINE**

## MOLA YS PER SOGLIA/DAVANZALE

Wheel YS for windowsill / threshold

10 - 40 mm

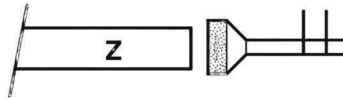

**COMPACTLINE**

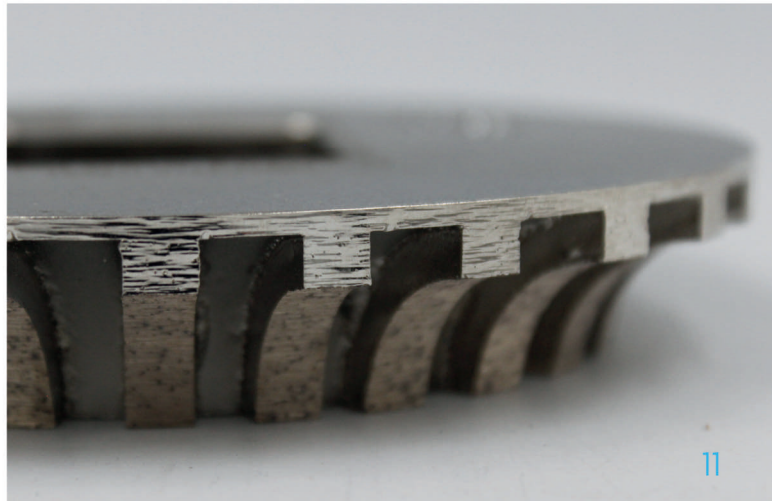

**ESPANSORE PORTA NASTRI  
PER COSTA DRITTA 90°**  
Holder expander for grinding belt  
MAX H 35mm  
**COMPACTLINE**

**MOLA LAMELLARE GR.150 / 400**  
Lamellar wheel 150 / 400 grain  
**COMPACTLINE**

**MOLE PER BATTISCOPA, TORO, JOLLY 45°, LAMELLARI, RESINOIDI**  
Wheels for Bullnose or Half-Bullnose, 45° mitre, lamellar and resinoid  
**INDUSTRIALINE**

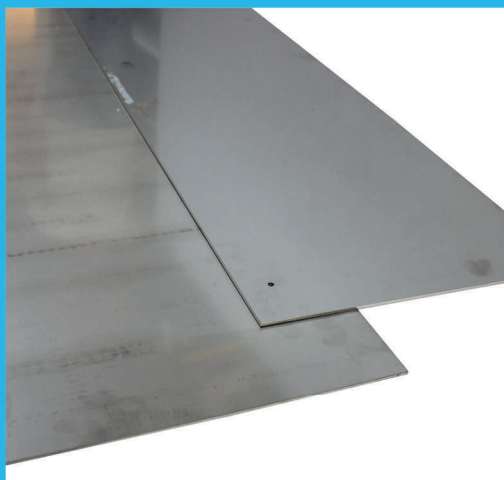

**NASTRI DA TAGLIO**  
BELTS FOR CUTTING MACHINES
